

## GLOBALG.A.P. IT Solutions Newsletter - Recent changes and updates

### GLOBALG.A.P. IT Solutions Newsletter – Issue March 2024

In this newsletter, you can find all the latest news and updates on the GLOBALG.A.P. IT systems.

#### [Audit Online Hub](#)

The following versions were transferred from BETA environment (beta-audit.globalgap.org) to LIVE (audit.globalgap.org) and DEMO (demo-audit.globalgap.org) environments on 20 March 2024.

#### Important note to API users

Please check LIVE Audit Online Hub (AOH) to see whether this update has affected your API. If you notice any issues, contact our [Customer Support team](#) immediately.

#### LIVE AOH v4.2.0

##### Configuration changes:

- Made the reviewer's comment box editable during audit generation if the user entered in the "Audit personnel" section matches the user who is creating the report (Smart audits (v6))

#### LIVE AOH v4.3.0

##### Configuration changes:

- Narrowed the selection of auditors in the "Audit duration per day" section to those auditors (farm auditor/QMS auditor) who have been entered in the "Audit personnel" section (Smart audits (v6))
- Aligned "Validity dates" in combined audit reports (Smart audits (v6))
  - From now on, the "Validity dates" in the "Certification body decision" section will be synced for base standards and add-ons when they are audited together. Note that in these cases, the "Validity dates" of any selected add-on will be disabled. The system will automatically populate these dates based on the input captured in the base standard.
- Added a new column to the audit list view to show the performance level (if applicable) of an audited standard or add-on
- Renamed the "Result" column in the audit list view to "NCs result"

##### Bug fixes:

- Resolved issue related to running the Audit/Get method

#### LIVE AOH v4.4.2

##### Configuration changes:

- Enabled validation for prefilling "Due dates" in bulk (Smart audits (v6))
  - The due date is automatically set to 28 days for all principles and criteria if no date is provided. Auditors still have the option to edit the date as necessary.

##### Bug fixes:

- Resolved issues with the v6 "Copy audit" functionality where a closed report was selected as the origin
- Resolved issues with the data processing responsiveness of the following API calls
  - /Audit/SaveControlPointValue
  - Audit/SaveControlPointValue\_Value
  - Audit/SaveControlPointValue\_Justification

**Note that as a result of this fix, API users can now submit bulk uploads with all control points and compliance criteria or principles and criteria in one step. This correction was implemented for both Legacy and Smart audits.**

Thank you to all our users who send us valuable feedback on their experience with AOH.
