

INTEGRATED FARM ASSURANCE GFS

Principles and Criteria for Fruit and Vegetables

VERSION 6.0-GFS_AUG24

NATIONAL INTERPRETATION GUIDELINE

FOR BRAZIL (South)

VALID FROM: 17 June 2026.

CREATED BY: PARIPASSU AND NTWG BRAZIL GROUP

GENERAL BACKGROUND INFORMATION

1. What is a national technical working group?

THINK GLOBAL, ACT LOCAL

That's the philosophy at the heart of GLOBALG.A.P.

This is why [GLOBALG.A.P. Community Members](#) set up [national technical working groups \(NTWGs\)](#) in several countries to help adopt GLOBALG.A.P. standards and add-ons on a national scale. NTWGs are established voluntarily by GLOBALG.A.P. Community Members in countries where there is a need for clarification in the implementation of GLOBALG.A.P. standards and add-ons.

The NTWGs identify specific local adaptation and implementation challenges and develop guidelines, known as [national interpretation guidelines \(NIGs\)](#). These NIGs provide guidance to certification bodies (CBs) and producers on how to best implement and audit against GLOBALG.A.P. principles and criteria at a national level.

The NTWGs are also a valuable source of qualified information for the GLOBALG.A.P. Secretariat. By tapping into national networks of experts and stakeholders, the GLOBALG.A.P. Secretariat gains extensive knowledge about the different legal and structural conditions that exist around the world.

The NTWGs work in close cooperation with the [GLOBALG.A.P. Secretariat](#) and the [technical committees \(TCs\)](#), who approve the NIGs developed by this growing number of groups.

2. What is an NIG and how is it developed?

An NIG is a document that provides guidance on the implementation and on auditing the compliance of a country's interpretation of the GLOBALG.A.P. criteria at a national level. The GLOBALG.A.P. criteria are the basis on which a country's interpretation is developed. The GLOBALG.A.P. principles are fixed and shall not be changed or interpreted.

A country's interpretation in an NIG always exists in conjunction with the GLOBALG.A.P. principles and criteria and cannot stand alone. Where there is **no country-specific addition** to the criteria that aids better understanding and implementation, the **original criteria are valid** and shall not be repeated in the country interpretation column.

Once approved, a country's interpretation of the criteria shall be audited together with the GLOBALG.A.P. principles and criteria. The country's interpretation **does not replace** the original criteria, but it is **a clarification** of them and exists in addition to the GLOBALG.A.P. principles and criteria.

The NIG is developed by a NTWG and goes through a transparent approval procedure and a peer review by relevant stakeholders in the country. After approval, the NIG becomes a GLOBALG.A.P. normative document. **This implies that all CBs that are working in the respective country shall include this NIG in their certification procedures.** It will also be indicated on the GLOBALG.A.P. certificate that an NIG has been implemented and that the CB audit took that into account.

The GLOBALG.A.P. Secretariat can withdraw or revise an NIG at any time on an individual basis if the global integrity of a GLOBALG.A.P. standard is challenged.

See the GLOBALG.A.P. general regulations version 6 – Rules for individual producers/Rules for producer groups and multisite producers with QMS, section 2.1 e).

SEE THE NIG [APPROVAL PROCESS FLOWCHART HERE](#).

1. **Submission:** The NTWG submits the NIG to the GLOBALG.A.P. Secretariat (email to: ntwg@globalgap.org) for internal technical review and approval. It is recommended to **check with the GLOBALG.A.P. Secretariat beforehand** to find the latest template for the respective NIG that shall be used. **The principles and criteria that refer to legislation have been highlighted and NTWGs should check these and refer to the relevant local legislation in the NIG.**

2. **Internal technical review:** The GLOBALG.A.P. Secretariat starts the internal technical review of the submitted NIG within two weeks of receiving the NIG. The GLOBALG.A.P. Secretariat **checks the NIG thoroughly in a timeframe of one month.**

If any technical or formal discrepancies are detected in this review, the NIG will be returned to the NTWG, which has **one month** to propose amendments. The GLOBALG.A.P. Secretariat shall **summarize all the consultation responses in an internal technical review report.** This report shall evaluate the proposed amendments, if any.

After a second review, the GLOBALG.A.P. Secretariat checks whether the NTWG has implemented all the comments. If there are any additional comments, they will be sent to the NTWG within one month. The NTWG again has one month to implement the changes.

3. **Peer review:** Once the internal technical review requirements have been met, the NIG shall be subject to a **peer review for a period of four weeks.** The peer review shall be conducted via written consultation with the relevant GLOBALG.A.P. stakeholders, GLOBALG.A.P. Community Members, and CBs in the respective country or continent. The consulted parties shall be invited to make written technical comments in English only and shall provide justification. The comments shall be sent to ntwg@globalgap.org.

If any technical or formal discrepancies are detected in this review, the NIG will be returned to the NTWG, which has **one month** to propose amendments to the GLOBALG.A.P. Secretariat.

4. **Approval by TCs:** A final peer review report shall be prepared by the GLOBALG.A.P. Secretariat, which shall summarize and evaluate the peer review comments and the proposed amendments, if any.

The final NIG and peer review report shall be submitted to the relevant TC for provisional approval. The relevant TC shall make one of the following recommendations to the GLOBALG.A.P. Secretariat in their TC meeting or by written procedure:

 - a. NIG is recommended for approval
 - b. Rejection of the NIG – reasons given

5. **Final approval and publication:** After the provisional approval by the TC(s), the GLOBALG.A.P. Secretariat finally approves the NIG. The following steps are taken by the GLOBALG.A.P. Secretariat in order to inform all the relevant stakeholders:
 - Uploading the NIG and announcement on the GLOBALG.A.P. website
 - Informing all GLOBALG.A.P. Community Members in the relevant country

- Informing all GLOBALG.A.P. approved CBs in the relevant country
- Informing all accreditation bodies in the relevant country
- Uploading information on the new NIG to CB Extranet

6. Consequences of the approval and publication of an NIG for:

CBs

- All CBs **shall confirm the receipt** of the approved NIG.
- CBs **shall inform all their clients** about the NIG.
- All CBs operating in the respective country shall include the NIG in their certification procedure **within three months of its publication.**
- After the three-month period, **CBs can be sanctioned for not applying the approved NIG.**

Producers

- There will be no major changes in the daily practice of producers. Rather, the NIG will facilitate the implementation of GLOBALG.A.P. principles and criteria, as it is adapted to the national circumstances, legal regulations, etc.
- Producers **will be informed about the NIG by their CBs.**
- Producers shall implement the GLOBALG.A.P. principles and criteria in accordance with the NIG **within three months of its publication.**

Accreditation bodies

- All accreditation bodies **shall confirm the receipt** of the approved NIG.
- **Accreditation bodies shall check whether all accredited CBs are applying** the NIG if they are certifying in the respective country within three months of its publication.
- After the three-month period, **CBs can be sanctioned for not applying the approved NIG.**

The implementation of the GLOBALG.A.P. IFA standard at a national level shall comply with the principles and criteria and the additional country-specific interpretation by the NTWG.

For certain criteria in this standard, the NTWG shall evaluate if they refer to national or regional legislation/regulations. If legislation exists, the NTWG shall make reference to these legal requirements and quote/explain the relevant parts of these legal requirements.

7. About producers implementing IFA principles and criteria in accordance with this NIG

During registration, producers may register with the CB by using their unique legal registration number for the country. This number is used for verification to avoid double registration in the GLOBALG.A.P. IT systems. The type of number may vary for each country (e.g., tax number, VAT number, producer number).

If required by this NIG, it is mandatory for the certificate holder (Option 1 and 3 individual producer and Option 2 and 4 producer group) and for the producer group members to share this unique legal registration number during registration with the CB.

If so decided by the NTWG, CBs shall record the type of number in the GLOBALG.A.P. IT systems as defined in this NIG.

For producers implementing this NIG in Brazil (South):

- The unique legal registration number is the CPF number. It is mandatory to record individual producers and producer groups in the GLOBALG.A.P. IT systems using this number for unique identification in the country.
- There is no unique legal registration number, or it does not need to be recorded.

				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 01	INTERNAL DOCUMENTATION				Documentação Interna
FV-GFS 01.01	A procedure is in place to manage and control documents and records.	<p>Documents and records affecting implementation of the requirements shall be managed and controlled.</p> <p>A documented procedure shall describe:</p> <ul style="list-style-type: none"> - How documents and records are created, reviewed, approved, and updated - How reviews are undertaken and changes or amendments are made - How version updates take place - How relevant documentation is made available to relevant staff <p>Documentation shall be:</p> <ul style="list-style-type: none"> - Identified with an issue number and/or date and appropriately paginated - Sufficiently detailed - Reviewed periodically to demonstrate ongoing compliance with the relevant requirements - Assigned to relevant staff - Revised to incorporate relevant modifications of the standard or normative documents within the period given by GLOBALG.A.P. - Approved by authorized staff prior to distribution - Effectively rescinded when obsolete 	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 01.02	Records for auditing purposes are up-to-date. Records are kept for a minimum period of two years, unless a longer period is required.	<p>All records generated or kept by the producer for auditing purposes shall:</p> <ul style="list-style-type: none"> - Be stored securely, readily accessible and kept up to date - Be retained for a minimum of two years, or longer if required by customers or prevailing regulations - Be valid and backed-up, if used in electronic format - Cover at least three months prior to the date of the initial certification body (CB) audit, or begin on the day of registration, whichever is longer - Reference full details of each area and all activities covered by the registration <p>Where an individual record is missing, the respective principle addressing those records is not compliant. For example, if the date of application is missing on a single spray record, a non-conformance or non-compliance shall be issued against that principle.</p>	Major Must	<p><i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i></p> <p>Regarding traceability records, according to the IFA, a minimum period of 24 months is defined for the retention of records.</p> <p>According to INC No. 02/2018 and No. 01/2019, for products that can be stored for extended periods, such as sweet potatoes, onions, and others that can remain stored for more than 6 months, the storage period must be extended, possibly exceeding 24 months, in order to guarantee traceability throughout the entire period in which the product is still in circulation or consumption.</p>	<p>Em relação aos registros de rastreabilidade, segundo o IFA, define-se um período mínimo de 24 meses para a guarda de registros.</p> <p>Segundo a INC nº 02/2018 e nº 01/2019, para produtos que podem ser armazenados por períodos prolongados, como batata, cebola e outros que possam permanecer armazenados por mais de 6 meses, o prazo de guarda deve ser estendido, podendo ultrapassar 24 meses, de forma a garantir a rastreabilidade durante todo o período em que o produto ainda possa estar em circulação ou consumo.</p>

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 01.03	The producer completes a minimum of one self-assessment/internal audit annually to the standard.	<p>The self-assessment/internal audit shall evaluate compliance, review implementation, and support identification of improvement opportunities. A program of site inspections ensures the site and equipment are maintained, in support of food safety. The frequency of inspections is based on assessed risk and type of activities.</p> <p>A documented self-assessment for individual producers or an internal farm and quality management system (QMS) audit for multisite producers with QMS and producer groups shall:</p> <ul style="list-style-type: none"> - Occur at least once a year and before the certification body (CB) audit - Be completed by the producer, assigned worker, or consultant, and/or as part of a QMS - Include all applicable topics covered by the standard/scope, even those addressed using subcontractors (including harvest and postharvest activities) - Assess all applicable sites and products <p>Self-assessments shall contain comments regarding the evidence observed for all not applicable and non-compliant Major Must and Minor Must principles and criteria. For internal farm audits, comments shall follow “GLOBALG.A.P. general regulations – Rules for producer groups and multisite producers with QMS.”</p>	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 01.04	Effective corrective actions are taken to address non-conformances detected during the self-assessments/internal audits.	Corrective actions shall be documented. Any necessary changes shall be implemented. Compliance with all applicable Major Musts and at least 95% of applicable Minor Musts is required.	Major Must		
FV-GFS 02	CONTINUOUS IMPROVEMENT PLAN				Plano de melhoria contínua
FV-GFS 02.01	A continuous improvement plan is documented.	<p>The producer shall evaluate the farming operation and identify improvements to be undertaken as assessed by the standard. These improvements shall be included in a longer-term plan covering up to three years.</p> <p>The continuous improvement plan shall consist of relevant self-defined targets and describe how progress toward each target will be monitored. The plan may include:</p> <ul style="list-style-type: none"> - Description of improvement objective - Current status, with date of initial target establishment - Planned activity - Target outcome with estimated date of achievement 	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 02.02	There is evidence that a continuous improvement plan is implemented.	The implementation of identified points in the continuous improvement plan shall be supported by evidence. Evidence may include new procedures or policies, data sharing (to quantify changes), training, etc. The continuous improvement plan shall be supported by documented evidence. The evidence kept on file may include: - Actual outcome of efforts, with date of evaluation - Comments on why the effort was successful or not successful - If one or more of the goals are not reached, justification and description of further action - Sharing of relevant data with the GLOBALG.A.P. Secretariat	Major Must		
FV-GFS 03	RESOURCE MANAGEMENT AND TRAINING				Gestão de recursos e treinamentos
FV-GFS 03.01	The roles and responsibilities of workers whose jobs have an impact on the implementation of the standard are defined.	Workers with assigned duties that affect food safety and the implementation of activities covered by the standard shall be identified, including: - Job function, responsibilities, and title - Position within organizational structure - Contact information - Alternate in case of absences One worker shall be clearly identifiable as responsible for workers' health, safety, and welfare.	Major Must	<i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i>

				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 08	MASS BALANCE				BALANÇO DE MASSAS
FV-GFS 08.01	Sales records are available for all quantities sold for all registered products.	Sales details of the quantities of products originating from certified and, where applicable, noncertified production processes shall be recorded for all registered products, with particular attention paid to quantities sold and descriptions provided. The documents shall demonstrate the consistent balance between the input and the output of products originating from certified and noncertified production processes.	Major Must		
FV-GFS 08.02	Quantities (produced, stored, and/or purchased) are recorded and summarized for all products.	Quantities (including information on volumes or weight) of incoming (including purchased products), outgoing (including reject, waste, pulp, etc.), and stored products (both from certified and, where applicable, from noncertified production processes) shall be recorded and a summary maintained for all registered products, so as to facilitate the mass balance verification process, while accounting for industry acceptable gains and losses. The frequency of the mass balance verification shall be defined and be appropriate to the scale of the operation, but it shall be done at least annually for each product. Documents to demonstrate mass balance shall be clearly identified. If the certification body (CB) audit is done during the harvest season, mass balance data from last year's harvest may be reviewed. This shall be prepared prior to the CB audit.	Major Must	For example, documents that track volumes/weights of products received, handled, shipped, lost, and current inventory, etc. and that clearly show certified input to output values, are acceptable evidence. Evidence may be provided through other record-keeping processes, such as inventory/sales software or other producer record forms that show product quantities from harvest to shipment. The	Por exemplo, documentos que rastreie volumes/pesos de produtos recebidos, manuseados, enviados, perdidos e estoque atual, etc. e que mostre claramente a entrada certificada para os valores de saída, são evidências aceitáveis. Podem apresentar evidências por meio de outros processos de manutenção de registros, como software de inventário/vendas ou outros formulários de registro do produtor que mostram as quantidades de produtos desde a colheita até o embarque. A frequência deve ser definida pelo produtor, mas deve permitir a avaliação de um período de tempo significativo.

				CRITERIA	CRITERIA
		<p>- The proportion of renewable vs. nonrenewable energy in the energy source</p> <p>Additional calculations can include, for example:</p> <ul style="list-style-type: none"> - The amount of energy imported into the farm (e.g., from the grid) - The amount of energy generated at producer level (e.g., through solar panels, with fuels) - The amount of energy exported (e.g., to the grid) <p>Metrics should refer to sources of energy, the farm's various production sites, ha of land under cultivation, units of time (e.g., growing cycle), nonrenewable and renewable energy sources, the amounts of energy per kg of product and ha of production, and/or the amounts listed above per kg of product.</p> <p>In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable. Results (data) on metrics at producer group and farm level should be available to indicate compliance.</p>			
FV-GFS 24	GREENHOUSE GASES AND CLIMATE CHANGE				MUDANÇAS GLOBAIS E GASES DE EFEITO ESTUFA
FV-GFS 24.01	The farm contributes to reducing GHG* emissions and removing them from the atmosphere.	Available evidence should indicate that the producer has awareness and knowledge of how on-farm practices can contribute to reducing GHG emissions and removing them from the atmosphere, for example in connection to energy, soil health, fertilizers, and food waste.	Recom.		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
	*Greenhouse gas (GHG) emissions refer to carbon dioxide (CO ₂), methane (CH ₄), nitrous oxide (N ₂ O), and fluorinated gases. Due to their varying potential to contribute to global warming, they are sometimes calculated as CO ₂ equivalents (CO ₂ e).	In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.			
FV-GFS 24.02	The farm enables the formation of organic carbon in soils and in biomass.	Available evidence should indicate that the producer is preparing to implement, or already implementing, agricultural practices that enable the formation of organic carbon in soils and in biomass, for example: - Crop residue management (burying residues, seeding on residues) - Use of cover crops in crop rotation, diversification of crop rotation, minimum or no tillage - Reduction of nutrient release in fertilizer management - Restoration of ecosystems - Carbon farming and practices to capture carbon in soil and biomass In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.	Recom.		
FV-GFS 24.03	The farm's contribution to reducing and removing greenhouse gases (GHGs) from the atmosphere is supported with metrics.	Acceptable metrics include the following: At minimum, the GHG equivalence of the total amount of energy use on the farm (in CO ₂ e/ha/month and CO ₂ e/kg/month).	Recom.		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
		<p>Additional calculations can include, for example:</p> <ul style="list-style-type: none"> - GHG equivalence of other amounts of energy that have been calculated for the farm - GHG equivalence as related to, for example, soil and biomass, carbon farming, or environmental footprint <p>Metrics should refer to the farm's various production sites, units of time (e.g., growing cycles), and to GHG per kg of product and ha of production. In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable. Results (data) on metrics at group and farm level should be available to indicate compliance.</p>			
FV-GFS 25	WASTE MANAGEMENT				GESTÃO DE RESÍDUOS
FV-GFS 25.01	A waste management system is implemented.	<p>A waste management system addressing potential contamination of product or the environment (air, soil, substrate, and water) shall:</p> <ul style="list-style-type: none"> - Be documented and current - Address collection, storage, and disposal of waste material, including plant protection products, fertilizers, wastewater, drainage, and packaging material, where applicable - Addresses potential for contamination of nearby water sources, roadways, and adjacent land 	Major Must	<p><i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i></p> <p>Effluent - Conama 430/11 together with 357/05 (Federal)</p> <p>Perform risk analysis and follow the laws for disposal of each type of waste</p>	<p>Efluente - Conama 430/11 junto a 357/05 (Federal)</p> <p>Realizar análise de risco e seguir as leis para destinação de cada tipo de resíduo</p> <p>Utilizar como referência: Lei Federal 7.802/1989, Lei Federal 9.974/2000, Decreto Federal 4.074/2002 e Resolução CONAMA 465/2014.</p>

				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 27.03	The producer's direct clients have been informed of the genetically modified organism (GMO) status of the product.	Documented evidence of communication shall be kept and shall allow verification that all products supplied to direct clients meet the agreed requirements.	Major Must	<i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i>	
FV-GFS 27.04	Adventitious mixing of genetically modified (GM) crops with conventional crops is avoided.	A visual assessment of the identification of GM crops and the integrity of the storage shall be made.	Major Must	<i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i>	
FV-GFS 28	SOIL AND SUBSTRATE MANAGEMENT				GESTÃO DE SOLO E SUBSTRATOS
FV-GFS 28.01	Soil management and conservation				Conservação e uso do solo
FV-GFS 28.01.01	To improve and optimize soil health, the producer has a soil management plan.	The producer shall demonstrate that consideration has been given to the nutritional needs of the crop and to maintaining soil fertility. Records of soil analyses and crop-specific information shall be available as evidence.	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 28.01.02	Soil maps have been prepared for the farm.	The types of soil should be identified for each site, based on a soil profile, soil analysis, or local (regional) cartographic soil type map.	Recom.		
FV-GFS 28.01.03	Crop rotation for annual crops is implemented, where feasible.	When rotations of annual crops to improve soil structure and minimize soil-borne pests and diseases are carried out, this shall be verifiable from planting dates or crop or field records. Records shall exist for the previous two-year rotation.	Minor Must		
FV-GFS 28.01.04	Techniques have been used to improve or maintain soil structure and avoid soil compaction.	There shall be evidence of the application of techniques (use of deep-rooting green crops, drainage, subsoiling, use of low-pressure tires, tramlines, permanent row marking, etc.) that are suitable for use on the land and, where possible, minimize, isolate, or eliminate soil compaction.	Minor Must		
FV-GFS 28.01.05	The producer uses techniques to reduce the possibility of soil erosion.	There shall be evidence of control practices and remedial measures (mulching, crossline techniques on slopes, drains, sowing grass or green fertilizers, trees and shrubs on the borders of sites, etc.) to minimize soil erosion (from water, wind, etc.).	Minor Must	<i>These criteria refer to a national/regional legal requirement. IF legislation exists, the NTWG shall make reference to these legal requirements.</i>	
FV-GFS 28.02	Soil fumigation				Fumigação do solo
FV-GFS 28.02.01	There is documented justification for the use of soil fumigants.	There shall be documented evidence and justification for the use of soil fumigants, including targeted problem, location, date, active ingredient, doses, method of application, and operator. Methyl bromide shall never be used as a soil fumigant.	Minor Must

				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 30.05.04	Water that comes into contact with products during harvest and postharvest meets the microbial standard for drinking water.	Water (including ice) used during harvest and postharvest activities (cooling, transport, washing, etc.) shall meet the microbial standards for drinking water and shall be handled so as to prevent product contamination. The only exception are flood-harvested cranberry fields, where analysis shall confirm that the water is not a source of microbial contamination for the product.	Major Must	The water used shall be potable and shall comply with the requirements of Ordinance GM/MS No. 888/2021.	A água utilizada deve ser potável e seguir os requisitos da Portaria GM/MS N° 888/21.
FV-GFS 30.05.05	Recirculated water used during production, harvest, and postharvest is changed or replenished at an appropriate frequency.	If water used during production, harvest, and postharvest activities is recirculated, an appropriate frequency for changing the water shall have been established based on applicable parameters (pH, efficacy of antimicrobial water additives, turbidity, visual evaluation, etc.). “N/A” if recirculated water is not used.	Major Must		
FV-GFS 30.05.06	Treated water used during harvest or postharvest is monitored appropriately.	Treated water (antimicrobial water additives, ozone, etc.) used during harvest and postharvest activities (e.g., cooling) shall adhere to a documented monitoring system for the treatment process and routine verification of acceptable parameters. Monitoring shall be executed at a frequency established according to a risk assessment. The values measured during monitoring shall be compared to the established allowable parameters. Corrective actions shall be taken for analysis results outside of the allowable thresholds.	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 30.06	Irrigation predictions and record keeping				Registros do histórico de irrigação
FV-GFS 30.06.01	Tools are routinely used to calculate and optimize crop irrigation.	The producer shall be able to demonstrate that crop irrigation requirements are calculated based on data (local agricultural institute data, farm rain gauges, drainage trays for substrate growing, evaporation meters, water tension meters for the percentage of soil moisture content, etc.). Where on-farm tools are in place, these shall be maintained to ensure that they are effective and in a good state of repair. "N/A" only for rain-fed crops.	Minor Must		
FV-GFS 30.06.02	Measures are taken to understand the amount of water used and actions identified for how to increase water use efficiency.	Records of the use of crop irrigation/fertigation water shall be kept, offering estimates of the amount of water needed to support their production. Where possible, ways to increase water efficiency shall be identified. In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.	Major Must		
FV-GFS 30.06.03	Management of water is supported with metrics.	Acceptable metrics allow calculating the following: At minimum, the total monthly amount of water used on the farm in agricultural production (in m3/site/month). The amount of water abstracted from specific sources should also be listed. Additional metrics may include, for example: - The monthly amount of water used in irrigation/ha. Indicators should refer to water sources (excluding rainwater), units of time (e.g., growing cycle), and	Recom.		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
		the amounts of water used per kg of product and ha of production. In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable. Results (data) on metrics at producer group and farm level should be available to indicate compliance.			
FV-GFS 31	INTEGRATED PEST MANAGEMENT				MANEJO INTEGRADO DE PRAGAS
FV-GFS 31.01	Implementation of integrated pest management (IPM) is assisted through training or advice.	Where the technically responsible person is the producer, experience shall be complemented by technical knowledge (access to IPM technical literature, specific training attendance, etc.) or the use of tools (software, on-farm detection methods, etc.). Where an external adviser has provided assistance, training and technical competence shall be demonstrated via official qualifications, specific training, etc., unless this person has been employed for that purpose by a competent organization. In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.	Minor Must		
FV-GFS 31.02	The producer is informed about the relevant pests, diseases, and weeds that affect their registered crops.	The producer shall offer a verbal demonstration of their knowledge on identifying the presence and potential damage of the relevant pests, diseases, and weeds that affect the registered crops. This demonstration can take place in the field, or the producer can explain how they train the corresponding workers on the relevant pests,	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
		diseases, and weeds that affect the main registered crop(s). In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.			
FV-GFS 31.03	There is an integrated pest management (IPM) plan describing the measures used at farm level to manage the relevant pests, diseases, and weeds that affect the registered crop(s).	The IPM plan shall describe the measures the producer uses or would consider using to manage the pests, diseases, and weeds relevant to the registered crop(s). It shall include: - A stepwise approach based on the preventive, nonchemical, and chemical methods which shall be applied depending on the crop and the specific situation as per judgement of the producer or expert adviser - Monitoring of pests, diseases, and weeds to determine whether interventions are needed, with action thresholds defined by the producer In Option 2 producer groups, evidence at quality management system (QMS) level is acceptable.	Minor Must		
FV-GFS 31.04	The producer implements prevention measures.	The producer shall show evidence of implementing at least two activities for the registered crops (individually or per group of crops) that include the adoption of production practices which maintain the vitality of the crops and could reduce the incidence and intensity of pest attacks, thereby reducing the need for intervention.	Major Must		

Section	Principle (Not to be changed or interpreted)	Criteria (Not to be changed)	Level	Country-specific interpretation of the criteria by NTWG	
				ENGLISH	PORTUGUESE
				CRITERIA	CRITERIA
FV-GFS 31.05	The producer practices monitoring of their registered crops to plan pest and disease management.	The producer shall show evidence of implementing at least two activities for the registered crops that will determine when and to what extent pests and their natural enemies are present, and using this information to plan what pest management techniques are required.	Major Must		
FV-GFS 31.06	The producer makes interventions to manage pests.	The producer shall show evidence for situations in which specific interventions were made against pests adversely affecting the economic value of a crop. The producer may elect to take no action against the pest and incur the economic loss. Where possible, nonchemical approaches shall be considered. "N/A" if the producer did not intervene.	Major Must		
FV-GFS 31.07	Anti-resistance recommendations have been followed to maintain the effectiveness of available plant protection products (PPPs).	If the level of a pest, disease, or weed requires repeated controls in the crops, there shall be evidence that anti-resistance recommendations either on the label or from other sources (where available) are followed. If only one chemical mode-of-action or class of PPP exists or is permitted for use in the country of production or country of export, rotation of product types may not be possible due to lack of availability of suitable alternatives. The resistance management strategy shall be documented and consider the following points: - Always follow the recommendations on the product label. - Avoid lower dose rates to ensure optimal application quality.	Minor Must	Law 14.785/23 Provides for research, experimentation, production, packaging, labeling, transportation, storage, marketing, use, import, export, final destination of waste and packaging, registration, classification, control, inspection and supervision of pesticides, environmental control products, technical products and similar products;	Lei 14.785/23 Dispõe sobre a pesquisa, a experimentação, a produção, a embalagem, a rotulagem, o transporte, o armazenamento, a comercialização, a utilização, a importação, a exportação, o destino final dos resíduos e das embalagens, o registro, a classificação, o controle, a inspeção e a fiscalização de agrotóxicos, de produtos de controle ambiental, de seus produtos técnicos e afins;

FV-GFS 33.02	Foreign bodies				Corpos estranhos
FV-GFS 33.02.01	Systems are in place to ensure that foreign materials do not contaminate products.	Systems shall be in place to ensure that foreign materials, including insects, stones, debris, glass, and hard plastic, do not contaminate products. Glass, hard plastic, and similar materials (light bulbs, fixtures, etc.) suspended above products or used for product handling shall be of a safety design or protected/shielded.	Major Must	RDC No. 14 of 2014 – ANVISA provides for macroscopic and microscopic foreign matter in food and beverages, their tolerance limits and other provisions	RDC nº 14 de 2014 – ANVISA dispõe sobre matérias estranhas macroscópicas e microscópicas em alimentos e bebidas, seus limites de tolerância e dá outras providências
FV-GFS 33.02.02	A procedure is in place for handling foreign material contamination.	A documented procedure for handling foreign material contamination, including glass and hard plastic breakages (in greenhouses, product handling, preparation and storage areas, etc.) shall be in place.	Major Must	RDC No. 14 of 2014 – ANVISA provides for macroscopic and microscopic foreign matter in food and beverages, their tolerance limits and other provisions	RDC nº 14 de 2014 – ANVISA dispõe sobre matérias estranhas macroscópicas e microscópicas em alimentos e bebidas, seus limites de tolerância e dá outras providências
FV-GFS 33.03	Temperature and humidity control				Controle de umidade e temperatura
FV-GFS 33.03.01	Controlled storage conditions are maintained.	Temperature-, humidity- (where relevant), and atmosphere-controlled storage areas shall be monitored and maintained. Records of monitoring shall be kept.	Major Must	RDC No. 275 of 2002 – ANVISA provides for the Technical Regulation of standardized operating procedures applied to food producing/processing establishments and the Checklist of Good	RDC nº 275 de 2002 – ANVISA dispõe sobre Regulamento Técnico de procedimentos operacionais padronizados aplicados aos estabelecimentos produtores/industrializadores de alimentos e a Lista de Verificação das Boas Práticas de Fabricação em Estabelecimentos

				Manufacturing Practices in Food Producing/Processing Establishments	Produtores/Industrializadores de Alimentos
FV-GFS 33.04	Pest control				Controle de pragas
FV-GFS 33.04.01	A pest management plan is in place and implemented.	A pest management plan for monitoring and control of pests in the packing and storage areas shall be in place. There shall be visual evidence that the pest monitoring and correcting processes are effective.	Major Must	RDC No. 275 of 2002 – ANVISA provides for the Technical Regulation of standardized operating procedures applied to food producing/processing establishments and the Checklist of Good Manufacturing Practices in Food Producing/Processing Establishments	RDC nº 275 de 2002 – ANVISA dispõe sobre Regulamento Técnico de procedimentos operacionais padronizados aplicados aos estabelecimentos produtores/industrializadores de alimentos e a Lista de Verificação das Boas Práticas de Fabricação em Estabelecimentos Produtores/Industrializadores de Alimentos
FV-GFS 33.04.02	Records are kept of pest control inspections and corrective actions taken.	Monitoring shall take place and records of pest control inspections and follow-up action plan(s) shall be kept.	Major Must	To assess the handling area, consider RDC No. 275 of 2002 – ANVISA provides for the Technical Regulation of standardized operating procedures applied to food production/processing establishments and the Checklist of Good	Para avaliação da área de manipulação, considerar a RDC nº 275 de 2002 – ANVISA dispõe sobre Regulamento Técnico de procedimentos operacionais padronizados aplicados aos estabelecimentos produtores/industrializadores de alimentos e a Lista de Verificação das Boas Práticas de Fabricação em Estabelecimentos

				CRITERIA	CRITERIA
FV-GFS 33.06	Environmental monitoring program				Programa de monitoramento ambiental
FV-GFS 33.06.01	A risk-based microbial environmental monitoring program is in place for product handling areas.	Where postharvest activities are included in an operation, there shall be a risk-based microbial environmental monitoring program in place for the product handling areas. The program shall allow for assessment of effectiveness of cleaning procedures in reducing food safety risks and identify sources of potential contamination (in water, on surfaces, etc.). The risk assessment shall determine the areas of possible contamination (e.g., high traffic or difficult-to-clean locations). Controlled environment agriculture (CEA) with environmental monitoring programs shall show documentation for applicable production activities and not be limited to product handling.	Major Must	To assess the handling area, consider RDC No. 275 of 2002 – ANVISA provides for the Technical Regulation of standardized operating procedures applied to food production/processing establishments and the Checklist of Good Manufacturing Practices in Food Production/Processing Establishments	Para avaliação da área de manipulação, considerar a RDC nº 275 de 2002 – ANVISA dispõe sobre Regulamento Técnico de procedimentos operacionais padronizados aplicados aos estabelecimentos produtores/industrializadores de alimentos e a Lista de Verificação das Boas Práticas de Fabricação em Estabelecimentos Produtores/Industrializadores de Alimentos
FV-GFS 33.07	Air and compressed gases				Ar e gases comprimidos
FV-GFS 33.07.01	Air and compressed gases are monitored, stored, and handled so as to minimize food safety risks.	Air and compressed gases used in product handling (e.g., for drying) and which could affect food safety shall be regularly monitored, appropriately stored, and handled so as to minimize the risk of product contamination. Based on a risk assessment, the degree of monitoring appropriate for compressed air that comes into contact with the product shall be defined. Risk mitigation activities may include monitoring of filters and do not necessarily require laboratory analysis of air samples.	Major Must
